

NEED A LOW COST DRUG PLAN? NO PROBLEM.

Join Canada's First Members Only Savings Program & Provide Your Members With Access to Low Cost Prescriptions.

WHAT is Genrus United?

A "Members Only" program, Genrus United is a new low-cost option you can offer your group that provides access to prescription savings across a network of community pharmacies.

Members of the Genrus United buying group save up to 80% on everyday medications for chronic and mental health conditions to treat anxiety, depression, blood pressure, cholesterol, heart disease, Type II diabetes, ulcers, reflux, and asthma. Also available are savings on birth control pills and erectile dysfunction medication.

To date, Members save an average \$392 per year on everyday medications.

WHY was Genrus United created?

The number of Canadians without drug coverage is increasing and 1 in 3 employees (or 20% of all Canadians) do not have drug and health plan benefits. The gap is widening, and more people need to stretch their wages further. Many struggle to afford their prescriptions and resort to splitting pills, skipping days or not taking medications at all. Some must prioritize other living expenses ahead of their medications. Genrus United offers a solution.

HOW does Genrus United do this?

Genrus United is NOT insurance, there are no health, age or income questions. We simply leverage the buying power of our Members and reduce the cost of health services for the patient and anyone can access the program.

Claim a Free 6-month Trial in Partnership with Ignite

In collaboration with Genrus United, Ignite is offering six months Prescription Savings Program memberships. This is FREE to all Ignite members and their employees. Simply scan the QR code below to get started!

After Joining, Members Can Use Genrus United Quickly and Easily!
